Rose Days Will Soon Be Here

*A*RE you anticipating their arrival?

Where shall you have Roses this year?

Prepare for Rose Days *now*—cover that fence or porch or trellis with Ramblers; let Climbers be the back-ground for the main garden.

Select your colors—tell us—and the problem is solved.

A few new Roses for the central spot of attraction, a few old but attractive varieties for the main show and always a few June Roses for their beautiful bloom in June and attractive foliage and bush throughout the summer.

And THEN you will take a personal pride in your Garden during Rose Days and a personal joy in their fragrant beauty.

Plant your Roses where water does not stand, in a sunny place where the sun shines for half the day at least, have the holes for the Roses well-dug for two feet, plant an inch below the old dirt mark and

then add well-rotted cow manure only on the top of the ground.

With a little watering at first and in dry spells you should have beautiful and frequent blooms that will repay beyond count the *play-time* effort given their first attention.

But sometimes enemies approach from the air, as it seems, and blight the promised joy.

Vigorous healthy plants seldom mind these enemies.

Keep your Roses clean and healthy and they will usually resist most of these enemies. The worst one is the Rose Bug. Pick him off by hand into a can of kerosene or spray thoroughly with diluted Melrosine.

If it be small green lice, use whale oil soap or Black Leaf 40. If it be a white mould or mildew or Black Spot with dropping leaves, spray with Bordeaux Mixture every two weeks (1 oz. to 1 gal. of water).

And—here is the most important point—to be sure of having vigorous healthy bushes, buy Budded Roses by all means, those which have good strong roots already

grown for you, such as are grown at New Brunswick.

These three features merit your patronage:

1. Our Bushes are all Hardy 2-year field field grown Budded Roses.
2. We guarantee our Roses to grow and bloom the first year after planting or replace them free of charge.
3. We prepay Postage or Express on all Cash Orders.

Planting New Brunswick Roses will bring to you the evidence as nothing else can that we are *making good* in our efforts to produce the Best Roses in America for American Gardens.

FRED D. OSMAN, *Prop.*

The New Roses

SOUVENIR DE CLAUDIUS PERNET,
Monsieur Pernet-Ducher's latest masterpiece,
named after his son who gave his life in the late World War.

Awarded Gold Medals at Bagatelle Gardens and Rose Shows in Paris and Antwerp. An ever-blooming Hybrid Tea.

Pernet-Ducher's own description.

A most vigorous grower of erect branching habit, few thorns, long pointed buds of exquisite shape carried on long stems. Very large full flowers with elongated deep petals, a beautifully formed bloom. Color most striking sunflower yellow, deeper in center, without any color blending which is retained in the warmest weather.

A limited supply at \$5.00 each.

UNA WALLACE. A beautiful soft even toned cherry rose without shading. In depth, formation and substance it is faultless, every bloom coming perfect and quite full. Foliage very pleasing. A free grower with sweet perfume.

\$3.00 each, \$30.00 per dozen

HUGONIS. Robert Pyle, President of the American Rose Society, calls it the Pioneer of a new race of Hardy Roses.

This Rose Bush in full bloom presents a beautiful sight. Many of the branches are covered with beautiful yellow blooms which contrasted with the reddish branches and green leaves give a pleasing splash of color.

The Bush grows more like a shrub, spreading gracefully as it grows in height.

A limited supply is available at \$3.50 per bush; \$35.00 per dozen.

MISS LOLITA ARMOUR. Deep coral-red with a golden coppery-red suffusion. Base of petal rich golden yellow with coppery red sheen. Strong growing habit and very free-flowering. One of the most fragrant of the entire list of Garden Roses. Won Gold Medal in Bagatelle, France, as being the best Novelty Rose on exhibition for 1921.

\$2.50 each, \$25.00 per dozen

MADAM BUTTERFLY. This is Hill's glorified sport of Ophelia. All the color tones of Ophelia are intensified making it a harmony of bright pink, apricot and gold.

Ophelia ranks at the top of popularity but Madam Butterfly will surpass it. It averages more petals to the bloom, it produces more blooms to the plant because it makes more branches. Unique for corsages and for low table decorations.

\$2.50 each, \$25.00 per dozen

STANDARD OR TREE ROSES

We have had so many requests for Tree Roses that we offer this season eight choice varieties all well known and popular.

Tree Roses like other plants of a Standard type are less hardy than Bush Plants but to those who will take the care to protect them well through the winter, wrap the stem and keep moist during dry weather, we can assure an extra measure of Rose enjoyment.

All ever-blooming except Druschki.

\$3.00 each, \$30.00 per dozen.

Betty, coppery Rose. Testout, silvery pink.

Druschki, best white. Killarney, rich pink.

Georgeous, copper yellow. Cecille Brunner, rosy pink, baby rambler

Ophelia, salmon flesh. Mme.Ed.Herriott,coral.

HYBRID TEA BUSHES

*Ever-blooming Varieties at \$1.50 each,
\$15.00 per dozen, \$100 per 100.*

COLUMBIA. One of the most popular of the recently introduced Roses. The flowers are large and of a beautiful pink that become more intense as the blooms mature. A vigorous grower, bearing its flowers on long, stiff stems that are thornless for 10 to 12 inches below the flower. Said to be free from mildew and spot. A Rose that will stand out in any garden.

GOLDEN OPHELIA. A seedling of Ophelia, with many of its characteristics. In color it is golden yellow at the center, paling slightly at the outer petals. The blooms are of medium size, very compact, and open very symmetrically. A great addition to the Yellow Rose class, which is becoming more popular.

LADY MARY WARD. Flowers rich orange, shaded deeper apricot-orange, with a decided metallic sheen and touches of bronze red. It is vigorous, of erect habit, and produces a profusion of its fragrant blooms. Resembles Mrs. Aaron Ward, but considered an improvement.

LOS ANGELES. A wonderfully pretty American Rose introduced in 1915. In color a flame-pink, toned with coral and shaded with gold at the base. The buds are long and pointed. The growth is vigorous to a degree. The beauty of form and color are maintained from the bud until the petals drop.

PAUL'S SCARLET CLIMBER. Surpasses in brilliancy any other climbing Rose, and the flowers remain in good condition for an unusually long time. It is a vivid scarlet, shaded with bright crimson, and does not burn or fade until the petals fall. Makes a magnificent display. A new variety of great worth.

ROSE MARIE. Remarkable freedom of bloom, beautiful buds and well-formed flowers of a pleasing clear rose-pink. We have no hesitancy in pronouncing it the best bedding Rose of its color today. It produces ideal long buds which open into large flowers of splendid form; a valuable acquisition.

SOUVENIR DE LA MALMAISON. Medium size, compact flower, flesh pink, exquisite in bud, holding its petals tightly until full bloom. A scarce variety.

*Ever-blooming Varieties at \$1.25 each,
\$12.00 per dozen, \$90.00 per 100*

AUGUSTINE GUINOISSEAU. The blooms are white, overlaid with soft blush, fragrant. Very free bloomer.

BETTY. Blooms extra large, full and globular, with a delightful fragrance. Color coppery rose overspread with golden yellow. Good autumn bloomer.

CHRISSIE MACKELLAR. Orange pink veined carmine. A difficult coloring to describe. Free flowering and richly scented. Semi-double with pointed buds.

ETOILE DE FRANCE. Velvety garnet-red cup, with center of vivid cerise. Flowers very large and full. Fragrant.

GEORGE C. WAUD. Orange vermillion —a light red. Large flower of perfect shape, holding its color unusually well.

GORGEOUS. Deep yellow, flushed copper yellow and heavily veined with reddish copper. Flowers large and well-formed.

GRUSS AN TEPLITZ. One of the best garden Roses, giving many beautiful flowers over a long period. The flowers are crimson-scarlet. Fine for hedges.

GUSTAV GRUNERWALD. Broad petals of bright carmine-pink, center yellow. The buds are long and pointed and the flowers are large, full and perfect.

HUGO ROLLER. A medium-sized handsome Rose of clear lemon-yellow, suffused and edged with soft crimson. It is a vigorous-growing variety of much worth for bedding. Free bloomer.

KILLARNEY or IRISH BEAUTY. An old favorite. Brilliant pink with large pointed buds, broad wax-like petals with silvery edges and semi-full flowers of great beauty.

KAISERIN AUGUSTA VICTORIA. Creamy white, faintly tinted with lemon; large and full. Fine, glossy foliage. After all the introductions of the past twenty years this variety is still incomparable.

LADY ALICE STANLEY. A rose of remarkable vigor and size of flower. Outside of petals deep coral rose, inside pale flesh.

LADY HILLINGDON. One of the best Tea Roses of its color—deep apricot-yellow throughout. It is very beautiful in both bud and flower.

LADY PIRRIE. The blooms are large and nicely formed, outside of the petals deep coppery reddish salmon, inside flushed fawn and copper.

MARY, COUNTESS OF ILCHESTER. Very large flower; glowing carmine. Good grower and of fine habit. Attractive, deep green foliage.

MME. JULES GROLEZ. Large, full flowers, color bright china-rose. The bush is strong and produces many large flowers throughout the blooming season and until frost. A fine Rose for massing.

MME. SEGOND WEBER. An exceedingly handsome flower of beautiful rosy salmon. The center of the bloom is somewhat higher than the outside petals, giving the flower a globular appearance.

MISS CYNTHIA FORDE. Clear, rich pink. The flower is very full, the petals beautifully imbricated. Growth remarkably strong and upright.

OLD GOLD. Vivid reddish orange, with coppery red and coppery apricot shadings. Medium-sized, moderately full flowers are produced in profusion.

OPHELIA. By many rosarians Ophelia is considered the best Rose of its color. The blooms are large, full and very attractive. The color is light salmon-pink, shading to yellow at the base of the petals.

RADIANCE. An erect strong-growing Rose producing an abundance of light silvery flesh to salmon-pink flowers.

PREMIER. The handsomest dark pink to date, the originator claims. The large, full blooms are an exquisite pure rose-pink which is very lasting.

SOUVENIR DU PRESIDENT CAR-NOT. This variety has fine, long, graceful buds on rigid stems. The flowers are large, globular in form, and of exquisite rosy flesh color, shaded with white at the edges of the petals.

WELLESLEY. A most fragrant garden Rose of a beautiful shade of pink; vigorous, healthy grower, remarkably free flowering, with fine keeping qualities.

WILLIAM R. SMITH. The bush is strong and vigorous, bearing many beautiful blooms of large size; opens freely in all weathers. The color is soft silvery white, shading to a delicate soft peach-pink.

JUNE ROSES OR HYBRID PERPETUALS

\$1.00 each, \$10.00 per dozen,
\$75.00 per 100

AMERICAN BEAUTY. Deep rose, shaded carmine; very large, globular flower, produced on long, stiff stems; richly perfumed. The well-known, high-priced flower of the American florist. Preferable for Greenhouse culture.

BARONESS ROTHSCHILD. Light pink, large, and very symmetrical. Fine, cupped form; but weak in fragrance. Foliage fine and in great profusion right up to flower.

FRAU KARL DRUSCHKI, or WHITE AMERICAN BEAUTY or SNOW QUEEN. This is the queen of all white roses both in size and purity. The buds, however, are often tinged with pink, but this color appears only on the outside of the outer petals, and the flower opens to a pure snow-white.

MAGNA CHARTA. An old variety of great merit. The blooms are large in size and colored a rosy pinkish carmine. It is very fragrant and blooms in abundance.

MRS. JOHN LAING. Extremely large blooms of soft pink. Long buds; cup-shaped, fragrant flowers. Strong grower; free bloomer. A very popular Rose.

MRS. R. G. SHARMAN-CRAWFORD. Large flowers of deep rosy pink, the outer petals being delicately flushed with pale flesh. Strong and vigorous.

PAUL NEYRON. The largest Rose in existence, frequently reaching 6 inches in diameter. The color is clear pink, shading to soft rose; has a delightful fragrance.

ULRICH BRUNNER. Extra-large flowers of light red, bordering on scarlet or crimson—a shade of red distinctly its own.

HARDY CLIMBERS

Varieties at \$1.50 each, \$15.00 per dozen, \$100.00 per 100.

GLORIE DE DIJON. Large full blooms of handsome creamy buff on the outer petals, orange-yellow toward the center. Free-flowering and ever-blooming.

PAUL'S SCARLET CLIMBER. Surpasses in brilliancy any other climbing

Rose, and the flowers remain in good condition for an unusually long time. It is a vivid scarlet, shaded with bright crimson, and does not burn or fade until the petals fall. Makes a magnificent display.

ROSIERE. One of the new Climbers much like the beautiful Tauséndschon (Thousand Beauties) but superior in color, deeper and more even shade of cerise pink. A prolific bloomer.

Varieties at 75 cents each, \$8.50 per dozen, \$60.00 per 100.

AGLAIA OR YELLOW RAMBLER. A hardy climber; double golden-yellow flowers in large clusters.

*AMERICAN PILLAR. Large single flowers, cherry pink with clear white eye. Canes of vigorous growth and foliage distinctive and decorative turning from a beautiful dark green to bronze in Fall and early Winter.

CLIMBING AMERICAN BEAUTY. A climbing prototype of its parent, the American Beauty Bush. It has, however, better blooming qualities, a good foliage and has proven hardy, withstanding heat and draught.

CRIMSON RAMBLER (see Excelsa).

*DR. VAN FLEET. One of the best Climbing Roses. Perfect bud, long and pointed, deep pink and solid. When fully opened, petals are light pink, shading to deep pink at center. Foliage an especially attractive dark glossy green.

*DOROTHY PERKINS. The blossoms of medium size, are produced abundantly in large clusters, and are a delightful soft blush-pink color. They are very fragrant and retain their color a long time.

*EXCELSA. A worthy substitute for Crimson Rambler, with all the profusion of crimson, bloom in June. Unquestionably the best double red rambler.

GARDENIA, or HARDY MARECHAL NIEL. Large double flowers of bright yellow, whose blooms are borne in large drooping clusters.

HARRISON'S YELLOW. Fine double golden-yellow flowers.

*HIAWATHA. Single. Deep intense crimson, shading to snowy white at the base. Foliage light glossy green. An exceptionally beautiful climber.

PERSIAN YELLOW. Medium size deep yellow double flowers, a very hardy Climber.

WHITE DOROTHY PERKINS. A handsome pure white sport from the old favorite Dorothy Perkins, and it has all of the finer qualities found in that charming variety. It fills a long felt want in the list of white Roses, and is as popular as its pink parent.

NOTE—I year strong plants of those marked * may be had for 50c each, \$5.00 per dozen, \$35.00 per 100.

WILD ROSES

*50 cents each, \$5.00 per dozen
\$40.00 per 100.*

Universally admired for their distinct unforgetable fragrance, for the extravagant profusion of their pretty single flowers, and for the large, bright-colored berries which cling far into winter. Utilized for planting among shrubs, and to reclaim and cover waste ground.

ROSA BLANDA. (Meadow Rose). Slender, reddish purple branches almost thornless, with pale green, oval foliage. Bright rose. May-flowers.

ROSA CAROLINA. (Swamp Rose.)
Hardy in either wet or dry soil. Shrubby growth, pretty pink flowers.

ROSA LUCIDA. The familiar red fruit-ed “Wild Rose.”

ROSA NITIDA. Flowers are bright pink, branches are covered with straight prickles and bristles, foliage bright shiny green and glossy.

ROSA MULTIFLORA. Strong growing, with long arching canes almost covered with white clusters in June.

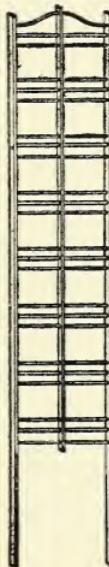

ROSA SETIGERA. Useful for massing in picturesque hillside brambles; as borders to wildwood drives. Large single flowers, color, a bright rose red.

ROSA RUGOSA RUBRA. Single flowers, rosy crimson; orange-scarlet fruits.

ROSA RUGOSA ALBA. Single white, single flowers and orange-scarlet fruit.

ROSA WICHURIANA. Memorial Rose. Single. A handsome Rose for covering banks and rockeries. Fragrant white flower-clusters; half-evergreen, glossy foliage.

Landscape Suggestions

We should be very glad to discuss landscape problems with you at any time. ¶ Simply write us giving us as much detail as possible of your problems. ¶ We have experienced landscape men at hand and offer suggestions without further obligation.

GEORGE ELIOT

in the Gypsy Maid, once said:

It will never rain Roses; where
we want to have more roses
we must plant more trees.
